Job description COD4IS
Retail IS Architect

Introduction to COD4IS

Re-enchanting the customer experience of French and international brands: this is the raison d'être of COD4IS. Our information system consulting firm supports luxury players (LVMH, L'Oréal, Lanvin, etc.) in their digitalization projects in France and abroad.

Our consulting firm is labeled HappyIndex®AtWork and Tech®AtWork 2022. These two independent labels, established by ChooseMyCompany, rank the companies where tech profiles and employees are the happiest.

Our onboarding process, our permanent support and the variety of missions that will be entrusted to you, will allow you to master the challenges and technologies of retail: this knowledge and experience will be an accelerator for your career.

Join us in this human and technical adventure at the service of brands and retailers! More information about our company on our website https://www.cod4is.com

Job description

Looking for a Retail IS Architect position?

Let's accompany retailers in the transformation of their Information Systems, together.
Join us!

You will be involved in missions carried out in varying retail environments, coordinating different specialists who will intervene in the IS to guarantee correct functioning. As the 'conductor', your expertise goes beyond simply technical, your conception of IS is such that it becomes a tool of development and strategy.

You will put in place multi-use data platforms, reusable and secure: data analysis, integration between applied business solutions, centralization of data repositories…

As a Retail IS Architect (permanent contract) you will…

- Participate in the collection of client needs
- Define the architecture to implement (functional, applicative, technical)
- Make application and technical choices of data platform solutions in SAAS and/or ON PREMISE environments
- Devise a development or integration plan
- Perform system maintenance & operation in Production environment
- Write technical and operational guide documents
- Lead and carry out the tasks

Profile we are looking for

Know-how
- Animate workshops
- Write summaries, minutes, specifications and reports
- Design API interfaces
- Command of web services and flows
- Participate in functional and technical conception of projects
- Contribute alongside development teams to the definition and implementation of flows to develop, while vigorously respecting the architectural rules

- Carry out the cost calculations, write the responses to RFPs, participate in defenses
- Carry out POC, POT, demonstrations

Skills

- Strong knowledge of the sectors (retail, fashion, luxury) and functional/business (CRM, logistics, POS, ecommerce)
- Use of Database Ms SQL Server
- Data stream exchange systems: flat files, API using EAI/ETL such as Talend, Data Exchanger, Mulesoft
- Knowledge of software packages and modules (CEGID Y2, SALESFORCE, CEGID ORLI, CYLANDE, ONESTOCK, SAP…)
- French required, professional and technical English desired

Required qualities

In addition to your technical IS competencies, communication skills are indispensable to precisely understand the challenges and needs of clients and bring forward proposals.

Excellent interpersonal skills also enable you to cultivate and develop the client network. Analytical capability in addition to a critical eye is key to enable fast determination of issues facing you and to find appropriate solutions.

Required Experience

BAC+5 level specialized in IT management, digital, IS management you have at least 2 years experience, technical as well as functional, in project owning, project owner support or project management support, and in development and integration of components (software packages, software, custom).

Work Environment

Cadre

You'll be based in the COD4IS offices in Paris with remote working options or sometimes at the clients offices. Plan for work travel. Your missions will bring you to work within different sectors of fashion, fine foods, etc. within small-medium sized companies or big groups.

Professional evolution

After multiple years of professional experience as Retail IS Architect at COD4IS, it is possible to be promoted hierarchically to become responsible for a team of consultants.

10 reasons to join us

To join COD4IS is to become part of a fast growing, yet human-sized company. Discover all the reasons to join us on our website.
